

Utility Hatch

Increased Field-of-Vision at the Workplace

The Quiet Solution for Fresh Air

With the special roof for all vehicles, the driver profits with maximal comfort and simple operation. The integrated roll allows to open and close the roof quietly.

The manually operated tilting and sliding mechanism enables an individual fresh air supply in an absolutely water-proof frame.

This roof was designed for a large range of applications and can be installed easily in various vehicles, anything from truck to defense vehicles.

Product Innovation

Product Benefits:

- Opens and closes quietly
- Suitable for ventilation of the cabin
- Made of Acrylonitrile butadiene styrene (ABS)
- Manual operation
- Large opening
- Water-proof and robust
- Simple installation
- World-wide service network
